

VISTA Data Project

From 130 VISTAs to One VA Care System

Safe, efficient, comprehensive, enterprise-wide (130) VISTA decommissioning with rapid migration to EHRM by ensuring seamless continuity of both [1] **Commodity** clinical and business services and [2] **Veteran-specific** clinical and business services through cloud-based, enterprise-scale, veteran integrated care services (VICS).

Veteran Integrated Care Services (VICS) enables functionality from all 130 decentralized VISTA systems to be safely, systematically and comprehensively decommissioned across all VISTA systems enterprise-wide (rather than one VISTA at a time) with no loss of Veteran- or VA-specific care or services.
